

MESSAGE FROM THE CEO

“At PREZIOSO Linjebygg, we are aware that the complexity and diversity of our businesses can sometimes make it difficult to identify high-risk situations, and even more difficult to know what attitude to adopt when faced with a hazard.

For that reason, numerous initiatives have been introduced at every level, to improve safety within the PREZIOSO Linjebygg community. These initiatives are always part of a continuous improvement process based on identifying, analysing and controlling risks.

To reduce these risks and make safety a genuine value shared by all its employees, PREZIOSO Linjebygg, together with the Institute for an Industrial Safety Culture (ICSI), is committed to making safety a basis of its corporate culture.

The approach that we promote enables everyone to become involved and give their opinion on topics relating to health and safety. On a day-to-day basis, everyone’s contribution is both necessary and welcome. It creates a collective commitment and helps us develop a genuine safety culture.”

Olivier Dufour, President and CEO

Our key drivers to develop our safety culture:

- Make safety a fundamental value shared by all
- Focus on the importance of major risks and their prevention strategy
- Share the safety vision and responsibilities between employees and management
- Foster individual intervention through transversal cooperation and dialogue
- Recognise good practices and apply fair penalties
- Develop leadership in safety through the entire chain of command, regardless of level or position
- Commit to a long-term approach
